

Biomedical Pathology

Job Opportunities Faculty Member

Yokohama City University invites applications for the position of Senior Professor in the Department of Biomedical Pathology (tentative name), who will be responsible for research and education related to basic research to elucidate the pathophysiology of life. The Department of Biomedical Pathology (tentative name) invites applications from researchers who can play a leading role in basic research that will create the future of medicine by conducting comprehensive research from the molecular/cellular level to the organ/individual level, while aiming to clarify fundamental principles and discover, create, and accumulate new knowledge.

We are seeking researchers who will pursue the elucidation of biological pathology without being restricted by research methods, and who will also pursue research that will lead to the development of therapies. Therefore, we welcome applications from researchers who are working with the latest technologies such as genome editing, single cell analysis, optogenetics, organoids, etc., as well as those who are working with information science such as artificial intelligence and systems biology.

Please note that there are currently no faculty members enrolled in this department, and one new associate professor, one lecturer, and one assistant professor (can be hired as three assistant professors) can be hired as full-time faculty members of the department after their arrival.
