

Microbiology  
Job Opportunities Faculty Member

Yokohama City University School of Medicine invites applications for faculty positions in the following research areas and subjects.

The Department of Microbiology at Yokohama City University School of Medicine studies immune responses to pathogens, tissue injury, and chronic inflammation, and the pathological conditions caused by abnormalities in these responses. Our educational goals are to develop research skills that will contribute to the development of microbiology and to foster individuals who can contribute to scientifically based countermeasures against infectious diseases. We welcome anyone in the field of medical science who is willing to work with us toward the goals of the department, regardless of previous research field. From the perspective of our mid-term plan, we welcome applicants who are willing to disseminate research results at international conferences (global initiatives) and obtain competitive research funds (acquisition of external funds). We will support new faculty members so that they can concentrate on basic research and their own value-added development, and form a high-quality career.

Department	School of Medicine and graduate School of Medicine
Position Title	Lecturer or Assistant Professor or Research Associate
Number of positions	2
Subject Areas of Teaching Responsibility	Research and education in the Department of Microbiology, School of Medicine and Graduate School of Medicine
